                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Searched:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Pred. No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.

A;Description: Arabidopsis thaliana chromosome II BAC F13M22 genomic sequence. A;Reference number: Z14677 A;Reference number: T02530 A;Status: translated from GB/EMBL/DDBJ

A; Molecule type:

C; Accession: T02530; C84795 R; Rounsley, S.D.; Kaul, S.;

submitted to the EMBL Data Library,

S.; Lin, X.; Ketchum, K.A.; Crosby, M.L.; Brandon, R.C.; ata Library, June 1998

probable expansin r13M22.14 - Arabidopsis thaliana
C;Species: Arabidopsis thaliana (mouse-ear cress)
C;Date: 05-Mar-1999 #sequence\_revision 05-Mar-1999 #text\_change 16-Feb-2001

1. FUNCTION: THIOL PROTEASE WHICH IS BELLEVED TO PARTICIPATE IN INTRACELULAR DEGRADATION AND TURNOVER OF PROTEINS. HAS ALSO BEEN IMPLICATED IN TUMOR INVASION AND METASTASIS.

1. CAPALYTIC ACTIVITY: HYDROLYSES PROTEINS, WITH A SPECIFICITY RESEMBLING THAT OF PAPAIN.

2. RESEMBLING THAT OF PAPAIN.

2. SUBUNIT: DIMER OF A HEAVY CHAIN AND A LIGHT CHAIN CROSS-LINKED BY A DISULFIDE BOND.
